## Universal Security Lock

Model  
440264

**Helps protect flat panel displays, desktop computers and data from theft.**

Most electronics theft is a crime of opportunity. It only takes a second to quickly steal an unprotected device computer from a desk or monitor mount. Millions of dollars of hardware and billions of invaluable data are stolen and unrecovered each year. The MANHATTAN® Universal Security Lock with its key lock (including two keys) helps guard desktop computers, flat panel displays, projectors, cameras and other valuable portable electronics from theft. Using a VESA bracket and included installation hardware, its heavy-duty steel cable and all-metal construction when secured to a permanent object help resist tampering to discourage any would-be thieves.

### Better Safe Than Sorry

Easily installed, the MANHATTAN Universal Security Lock protects electronics at office, schools and other public locations where expensive electronics are at risk. A durable PVC coating helps protect electronics, furniture and other objects from scratches and damage.

### Lifetime Warranty

Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.

**Model**  
440264
